Village Message regarding Misleading Water Quality Testing Notices

The Village of Scarsdale is aware that various residents have received notices and water quality testing kits in the mail from private water testing companies. Companies will often send test kits as a marketing tool to encourage recipients to purchase water quality systems from their organization. Please note that these kits and notices are not from the Village of Scarsdale and the Village does not work with any private water testing companies. Residents are not under any obligation to use private water quality test kits or send any test results. If you have any questions, please contact the Village's Water Department at 914-722-1138.
