NYSDOT to Repave Post Road: Expect Associated Impacts

We are pleased to announce that the New York State Department of Transportation is scheduled to repave the portion of Post Road passing through Scarsdale in its entirety starting on Monday, August 6th. This estimated \$2.1M project is not your everyday asphalt resurfacing.

The NYSDOT is going to do the job right so that it addresses a variety of existing physical roadway problems and ultimately delivers a traveling surface that will withstand the test of time and heavy usage. Doing it right translates into noise, lights, and heavy vehicle construction work involving long sections of Post Road. The Village is working with NYSDOT officials to minimize adverse impacts, but they are largely unavoidable given the project scope and location.

Heavy machinery and portable roadway construction lighting will be deployed between the hours of 7:00 p.m. and 6:00 a.m., Sunday through Thursday, beginning on Monday, August 6th. NYSDOT will endeavor to conduct the most disruptive elements of their work as early as possible on each day so as to minimize nighttime noise.

The work will begin near the border with Eastchester and proceed north from there, with the project estimated to be completed shortly after Labor Day. Residents and other Post Road users should avoid travel on Post Road as much as possible, as there will be lane closures and heavy construction activity. Motorists are advised to follow any posted detours and adhere to construction zone speed limits.

Official NYSDOT Traffic Alerts are available using [511](#) and through the [NYSDOT website](#).
