Con Edison to Replace Scarsdale Avenue Gas Main

Beginning on Wednesday, August 15th, Con Ed is beginning an estimated three to four week project involving replacing and upgrading the aging underground gas main on Scarsdale Avenue between Popham Road and Wright Place. Additional details are provided below.

Phase I: Wednesday, August 15th, through Saturday, August 18th.

- Roadway saw-cutting and point location excavation between 9:00 AM to 5:00 PM.
- Phase I is being undertaken in the daytime in order to minimize overnight noise impacts to surrounding residential areas.
- Minimal traffic impacts are anticipated and Scarsdale PD will be on-site providing traffic management support. Both lanes will remain open, but for point locations where work is taking place.
- Expect loud saw-cutting noise, traffic management measures, and Scarsdale Avenue parking restrictions – watch for posted signage.

Phase II: Monday, August 20th, through Friday, September 14th (estimated).

- Major roadway excavation and gas main replacement between 8:00 PM to 6:00 AM.
- Phase II is being performed at night to minimize otherwise potentially significant traffic and business impacts.
- During construction hours, Scarsdale Avenue will be reduced to one lane, managed by Scarsdale PD to provide for travel in both directions on an alternating basis.
- Expect construction lighting at night, roadway excavation noise, traffic management measures, and Scarsdale Avenue parking restrictions – watch for postage signage.

Motorists are encouraged to observe and obey all traffic and parking-related restrictions in the construction zone, and to exercise caution while traveling along Popham Road, particularly in the area of the intersection with Scarsdale Avenue.
