Traffic Advisory Notice Church Lane South and Popham Road

Con Edison has begun work to install 120 linear feet of gas main and a new natural gas regulator in the public right-of-way in front of 22 Church Lane South at the Popham Road intersection. The installation of the gas regulator is necessary to meet the high demand for gas in this area which is not currently being provided to the residents. The construction is expected to be completed in early January 2017, weather permitting.

Motorists should expect intermittent lane restrictions on Popham Road and Church Lane South during construction. The homeowners on Church Lane South between Popham and Hathaway will be detoured to Popham Road via School Lane. While Con Edison has a detour plan for the various phases of construction, and Scarsdale police officers will be on site for traffic control, it is advised that motorists allow extra time when traveling in the area or take an alternate route to avoid delays.

We appreciate your patience and cooperation during this project. For additional information, please contact the Village Engineer's Office at 914-722-1106.
