Fox Meadow Accident Involving Fire Hydrant

There was a motor vehicle accident earlier today involving a vehicle sheering off a fire hydrant on Fox Meadow Road. The accident caused localized street flooding on Fox Meadow Road between Crane Road and Wayside Lane. Damage to the Fox Meadow roadway also occurred.

Village Water Department staff have been on-site evaluating and repairing the water damage, and will continue into the evening until the necessary repairs are completed. No water service interruptions are anticipated at this time. Temporary street repairs will be in-place until Monday, November 7th, at which point the permanent street repair will commence, weather permitting.

Please note that water users in the area may experience discolored water, which does not present a public health concern. Once the work is completed, all faucets should be allowed to run until the water is clear. No boil advisory or warning is necessary at this time, as the integrity of the water main is intact.

Questions may directed to the Police Department non-emergency line, (914) 722-1200, today and through the weekend. The Water Department will be available for questions during normal operating hours on Monday, November 7th, at (914) 722-1138.
